## Enterprise Architect

### Who am I

I am an analytical architect, who finds the pain points in the enterprises and puts the efficiency factor higher. Besides that i create reports with forecasts in Java as websites.  
My Leadership counts in several situations to keep on the path to success. So I have to make decisions, when others hesitate.

### My last 5 Projects

German Bank 02/2018 - to date	The Architecture needs some several updates to fit the compliances. I have to coordinate and do the migration from the operation systems and the application platform. As technologies are mentioned JavaEE, WebSphere Application Server, RHEL, JBoss, Apache WebServer
Public 08/2018 - 01/2019	I played three roles in that maintaining project. I was Java Developer, Team-Lead and Architect for that software. The client discussed with me necessary changes, which has to be developed. As technologies are mentioned JavaEE, WebSphere Application Server, SpringBoot, Hibernate, GitHub, Jira, Jenkins, Eclipse
Telecom 04/2018 - 07/2019	I made several small improvements during that short time of maintaining a java-Based CRM for a big client in the telecommunications branch. As technologies are mentioned JavaEE, WebSphere Application Server, Swing, Eclipse
Bank 01/2018 - 03/2019	As part of a team i did some maintaining steps on the Java-based Portal for Customers. In that short period it wasn't possible to get deeper into the project. As technologies are mentioned JavaEE, JavaScript, WebSphere Application Server, GitHub, Hibernate, Spring, Eclipse
Bank 07/2017 - 12/2017	I was part of a remote team to maintain a Java-based software for the client. The software itself is webbased and based on an implementation of the first JavaEE implementations. As technologies are mentioned JavaEE, WebSphere Application Server, Eclipse

### Key skills

- ▶ Excellent interpersonal skills; ability to build strong relationships
- ▶ Ability to learn quickly and apply new knowledge in a fast-paced, business and technical environment
- ▶ Excellent Problem solving skills Strong leadership skills, including ability to motivate and inspire teams
- ▶ Good written and verbal communication skills, highly organized and able to interact professionally and appropriately at all levels of the organization
- ▶ Direct, hands-on experience or a strong working knowledge of vulnerability management tools
- ▶ Good knowledge of High Availability
- ▶ Ability to lead and influence
- ▶ Passion for learning and knowledge transfer
- ▶ Responsible, reliable and flexible

### Key technologies

- ▶ Java EE with Deloyment- and Test Automation-Management
- ▶ Enterprise Architecture Management
- ▶ Technical Leadership and Management
- ▶ Multiple Database Organisation
